

Endress+Hauser RID16-BA2A2

Field indicator with up to 8 input channels and FOUNDATION Fieldbus™ or PROFIBUS® PA protocol for displaying process and calculated values on the large back lit display with trend bargraph

Picture for reference only. Product appearance may vary based on configuration

The 8 channel indicator shows measured and calculated values, and status information of the fieldbus users in a FOUNDATION Fieldbus™ or PROFIBUS® PA network. In the listener mode the device listens to the set fieldbus addresses and indicates their values. In addition, for FOUNDATION Fieldbus™ values available on the bus can be indicated via function block interconnection. A plain text field allows the display of the engineering unit or of the TAG. A bargraph is available for trend visualization.

- Brilliant, back lit LC display with bargraph, diagnostic symbols and clear text field.
- No external power supply required.

Configuration of RID16-BA2A2:

Approval:	BA	ATEX II2G Ex ia IIC T6
Housing:	2	Alu
Cable Entry:	A	M16 female thread
Communication:	2	PROFIBUS PA

Alternative part number: RID16-13D5/0
