

Endress+Hauser Hydrostatic level sensor FMX11-CA11DS10

Pressure sensor for hydrostatic level measurement in freshwater applications.

Picture for reference only. Product appearance may vary based on configuration

The Waterpilot FMX11 is a reliable probe for hydrostatic level measurement. The device is certified for drinking water applications and the compact size makes it suited for use in bore holes and small diameter stilling wells.

- Certified for drinking water applications
- Compact size d=22mm (0.87") for applications in bore holes and small diameter stilling wells

Configuration of FMX11-CA11DS10:

Approval:	CA	Non-hazardous area + C/US Ordinary Location, UK marking
Output:	1	4-20mA
Sensor Range:	1D	200mbar/20kPa/3psi gauge, 2mH2O/6ftH2O/80inH2O
Calibration; Unit:	S	Sensor range; mbar/bar, mm/mH2O (base value), inH2O/ftH2O
Probe Connection:	10	10m cable

Alternative part number: FMX11-10D8/0
